# Screenshots of the app activities
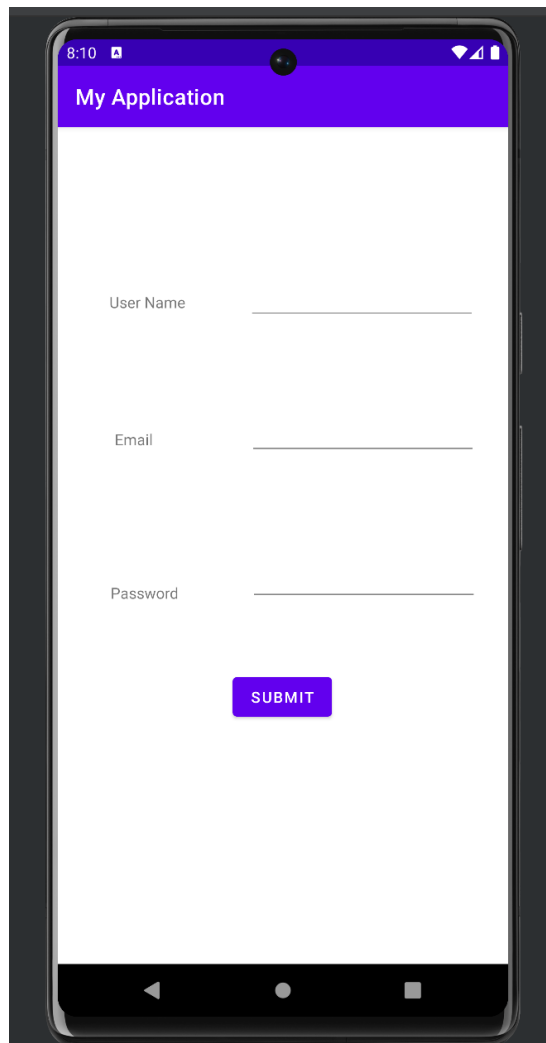

!. Login Activity

Enter the credentials or give my credentials to test :
Username: jai
Password: Jai*1234

2. Sign up page:

Or Signup from this page. Give valid email to get the verification code
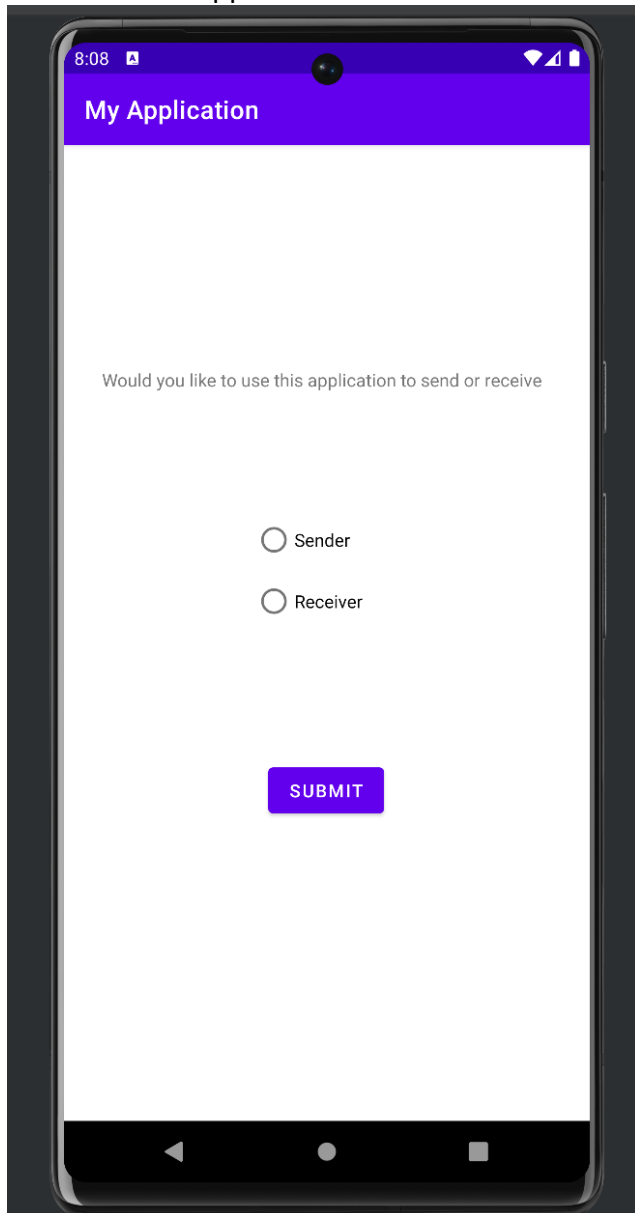

After verification Login to view the messages
Use the emulator message service to send the message to test -> you can see in the video
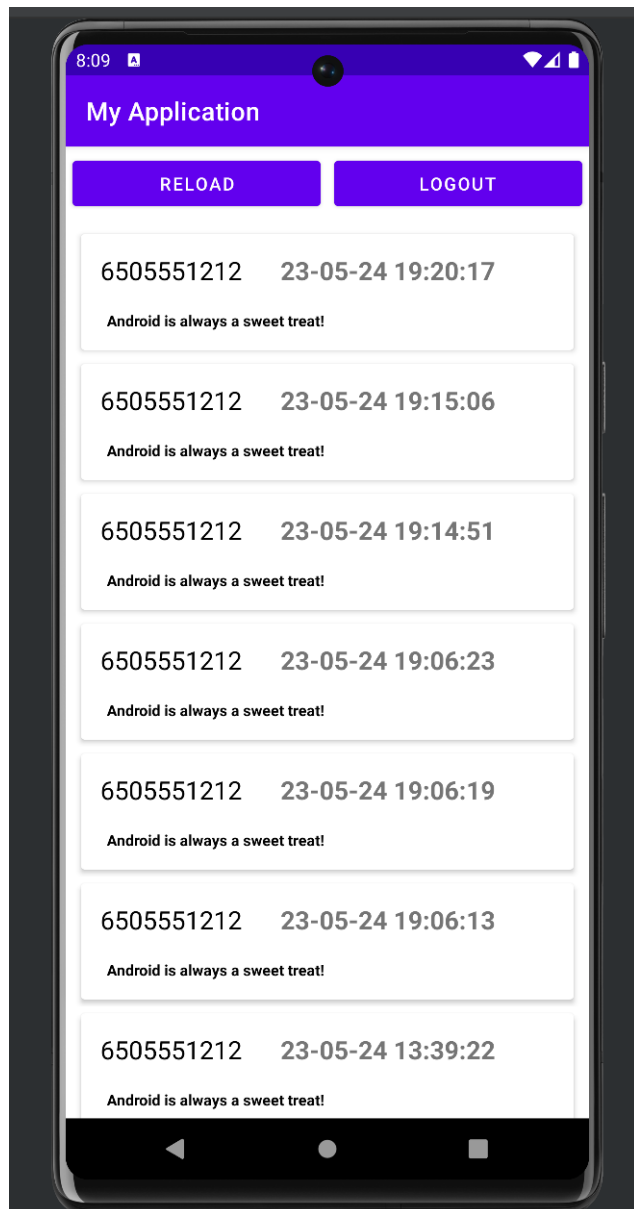

3. After signup it will ask the app to be sender or receiver.
   The sender app will read the incoming messages and send it to aws. And it will also display the sms by retrieving it from AWS
   The receiver app will retrieve the sms but wont read the sms

4. Activity to show all the sms

Reload -> To load new sms from aws
Logout -> to logout

5. On click messages will pop up to show in detail
